MI CABLE

As the only MI stocking distributor in the country, the Arthur J. Hurley Company can offer flexible terms and solutions to common problems, including hold for release orders.

Not ready to receive delivery on-site?

Give us the estimated cuts and we'll hold the material on master reels until you're ready for delivery

Length change after issuing a PO?

No problem. We don't cut material until it's ready to ship, allowing us to accommodate adjustments in either direction

One run got changed to pipe and wire?

No issue with Hurley. Since nothing was cut, we simply remove the hold on those lengths and sell them to another customer

All material is stocked in Boston

Master reels for every single conductor and most multi-conductor constructions, as well as termination kits, brass plates and tools to match are typically in stock and available

Fast deliveries

After final release, production takes no more than 48 hours depending on the volume of cuts

The price you see, is the price you pay

Freight charges will never be passed along. There are no cutting charges, reel charges or storage fees when you work with Arthur J. Hurley Company, Inc.
